PYTHON PROGRAMMING LABORATORY – 21CSL46

Prabodh C P • Mar 12, 2023

In this blog post, you will find solutions for the **PYTHON PROGRAMMING LABORATORY (21CSL46)** course work for the IV semester of **VTU** university. To follow along, you will need to set up a Python programming environment. We recommend using the Anaconda Python Distribution with Spyder as the integrated development environment (IDE). You can find the lab syllabus on the university's website or click **here**.

For detailed instructions as to setup the Python programming Environment refer to my previous blog shown here.

After getting the necessary development environment setup, Now lets focus on the solutions.

1. Question 1
    a. Test Average
    b. Palindrome

10. Question 10
    a. Merge selected pages from Multiple PDFs to a new PDF
    b. Fetch weather data from the JSON

Question 1

Calculation of Test Average

Write a python program to find the best of two test average marks out of three test's marks accepted from the user.

Python Code

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Tue Feb 21 16:27:47 2023

@author: Prabodh C P
"""

m1 = int(input("Enter marks for test1 : "))
m2 = int(input("Enter marks for test2 : "))
m3 = int(input("Enter marks for test3 : "))

if m1 <= m2 and m1 <= m3:
    avgMarks = (m2+m3)/2
elif m2 <= m1 and m2 <= m3:
    avgMarks = (m1+m3)/2
elif m3 <= m1 and m2 <= m2:
    avgMarks = (m1+m2)/2

print("Average of best two test marks  out of three test's marks is", avgMarks)
```

Output

```
Enter marks for test1 : 45
Enter marks for test2 : 39
Enter marks for test3 : 48
Average of best two test marks  out of three test's marks is 46.5
```

Palindrome Check & Digit Occurrence Count

Develop a Python program to check whether a given number is palindrome or not and also count the number of occurrences of each digit in the input number.

Python Code

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Tue Feb 21 16:35:54 2023

@author: Prabodh C P
"""

val = int(input("Enter a value : "))
str_val = str(val)
if str_val == str_val[::-1]:
    print("Palindrome")
else:
    print("Not Palindrome")

for i in range(10):
    if str_val.count(str(i)) > 0:
        print(str(i),"appears", str_val.count(str(i)), "times");
```

Output

```
Enter a value : 1234234
Not Palindrome
1 appears 1 times
2 appears 2 times
3 appears 2 times
4 appears 2 times
```

```
Enter a value : 12321
Palindrome
1 appears 2 times
2 appears 2 times
3 appears 1 times
```

Question 2

Fibonacci Sequence

Defined as a function F as Fn = Fn-1 + Fn-2. Write a Python program which accepts a value for N (where N >0) as input and pass this value to the function. Display suitable error message if the condition for input value is not followed.

Python Code

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Tue Feb 21 16:46:55 2023

@author: Prabodh C P
"""

def fn(n):
    if n == 1:
        return 0
```

```
    elif n == 2:
        return 1
    else:
        return fn(n-1) + fn(n-2)

num = int(input("Enter a number : "))

if num > 0:
    print("fn(", num, ") = ",fn(num) , sep ="")
else:
    print("Error in input")
```

Output

```
Enter a number : 5
fn(5) = 3
```

```
Enter a number : -1
Error in input
```

Binary to Decimal & Octal to Hexadecimal Conversion

Develop a python program to convert binary to decimal, octal to hexadecimal using functions.

Python Code

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Tue Feb 21 20:57:52 2023

@author: Prabodh C P
```

```
"""

def bin2Dec(val):
    rev=val[::-1]
    dec = 0
    i = 0
    for dig in rev:
        dec += int(dig) * 2**i
        i += 1

    return dec

def oct2Hex(val):
    rev=val[::-1]
    dec = 0
    i = 0
    for dig in rev:
        dec += int(dig) * 8**i
        i += 1

    while dec != 0:
        list.append(dec%16)
        dec = dec // 16

    nl=[]
    for elem in list[::-1]:
        if elem <= 9:
            nl.append(str(elem))
        else:
            nl.append(chr(ord('A') + (elem -10)))
    hex = "".join(nl)

    return hex

num1 = input("Enter a binary number : ")
print(bin2Dec(num1))
num2 = input("Enter a octal number : ")
print(oct2Hex(num2))
```

Output

```
Enter a binary number : 10111001
185
```

```
Enter a octal number : 675
1BD
```

Question 3

Sentence Statistics

Write a Python program that accepts a sentence and find the number of words, digits, uppercase letters and lowercase letters.

Python Code

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Wed Feb 22 01:37:07 2023

@author: Prabodh C P
"""

sentence = input("Enter a sentence : ")

wordList = sentence.split(" ")
print("This sentence has", len(wordList), "words")

digCnt = upCnt = loCnt = 0

for ch in sentence:
    if '0' <= ch <= '9':
        digCnt += 1
    elif 'A' <= ch <= 'Z':
        upCnt += 1
    elif 'a' <= ch <= 'z':
        loCnt += 1

print("This sentence has", digCnt, "digits", upCnt, "upper case letters", loC
```

Output

```
Enter a sentence : Rama went to Devaraja market to pick 2 kgs of vegetable
This sentence has 11 words
This sentence has 1 digits 2 upper case letters 42 lower case letters
```

String Similarity

Write a Python program to find the string similarity between two given strings.

Python Code

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Wed Feb 22 01:48:17 2023

@author: Prabodh C P
"""

str1 = input("Enter String 1 \n")
str2 = input("Enter String 2 \n")

Question 10

Merge selected pages from Multiple PDFs to a new PDF

Write a python program to combine select pages from many PDFs

Python Code

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Thu Mar  9 17:34:55 2023

@author: Prabodh C P
"""

from PyPDF2 import PdfWriter, PdfReader

num = int(input("Enter page number you want combine from multiple documents "))

pdf1 = open('birds.pdf', 'rb')
pdf2 = open('birdspic.pdf', 'rb')

pdf_writer = PdfWriter()

pdf1_reader = PdfReader(pdf1)
page = pdf1_reader.pages[num - 1]
pdf_writer.add_page(page)

pdf2_reader = PdfReader(pdf2)
page = pdf2_reader.pages[num - 1]
pdf_writer.add_page(page)

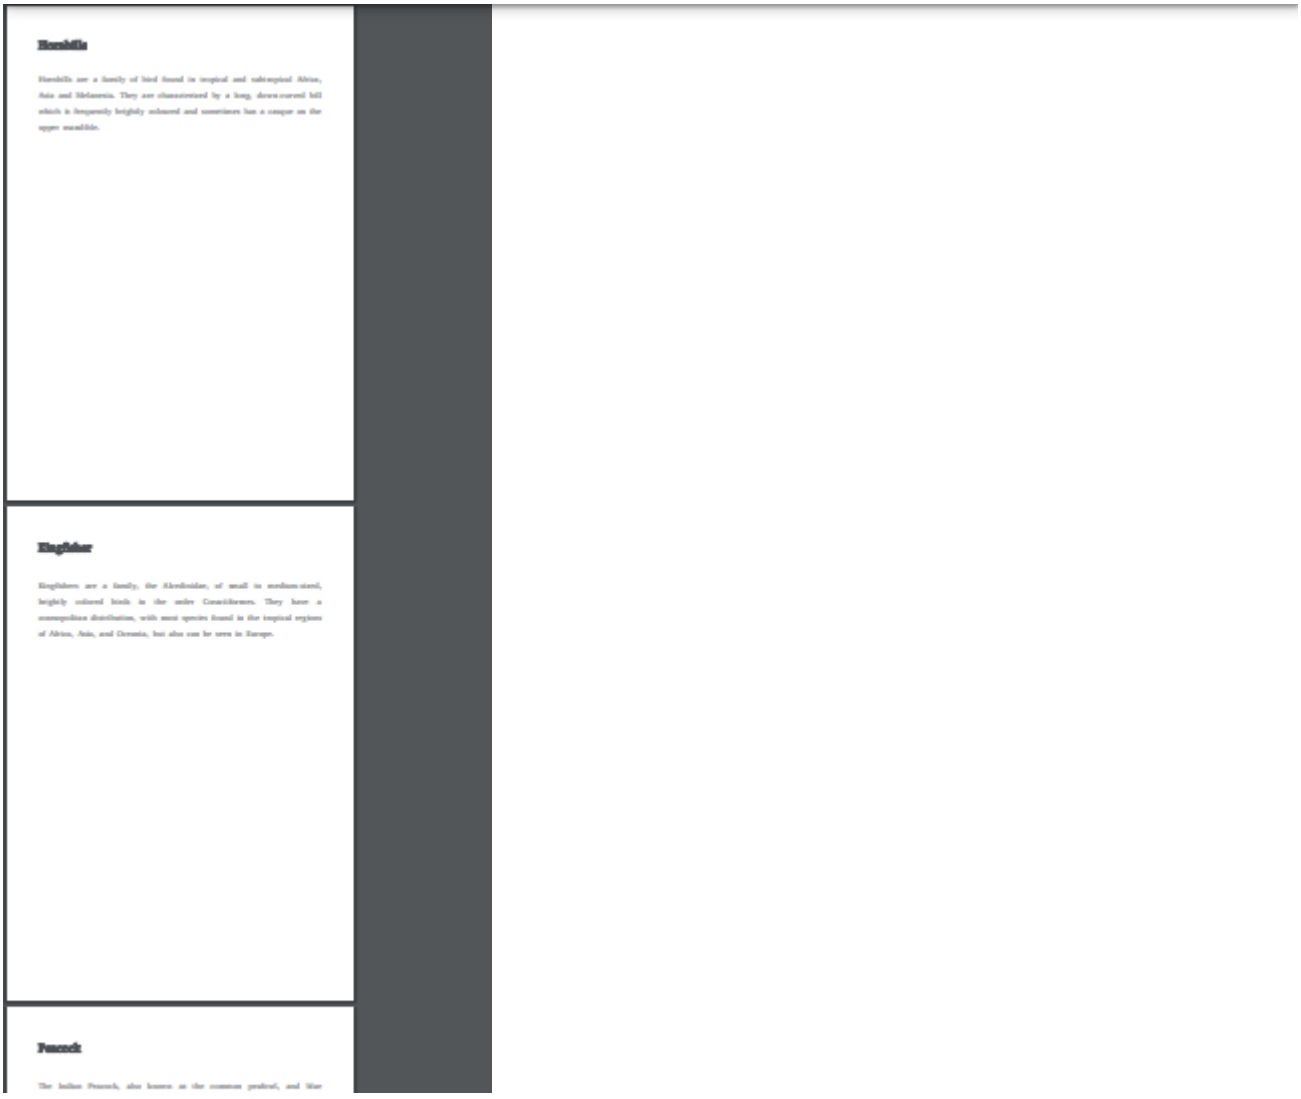
with open('output.pdf', 'wb') as output:
    pdf_writer.write(output)
```

Output

This program allows you to extract specific pages from two PDF files, “birds.pdf” and “birdspic.pdf,” by entering the page numbers as user input. Once you input the desired page numbers, the program fetches those pages from both PDF files and combines them into a new file called “output.pdf.” This way, you can easily compile the desired pages from multiple PDF files into one document for your convenience.

```
Enter page number you want combine from multiple documents 3
```

1 / 3

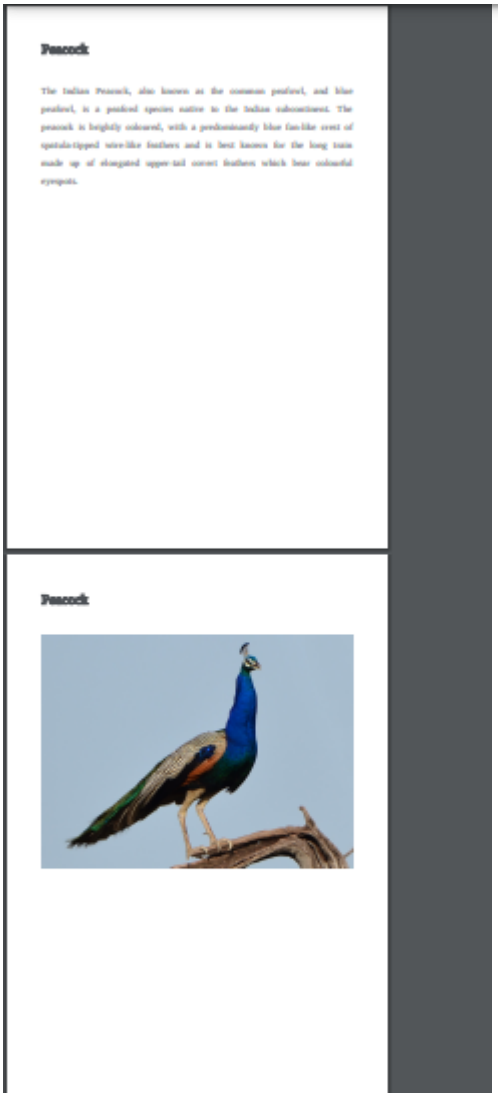


birds Download

1 / 3

birdspic Download

1 / 2



output Download

Fetch weather data from the JSON

Write a python program to fetch current weather data from the JSON file

Python Code

```python
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Fri Mar 10 09:22:53 2023

@author: Prabodh C P
"""

import json

# Load the JSON data from file
with open('weather_data.json') as f:
    data = json.load(f)

# Extract the required weather data
current_temp = data['main']['temp']
humidity = data['main']['humidity']
weather_desc = data['weather'][0]['description']

# Display the weather data
print(f"Current temperature: {current_temp}°C")
print(f"Humidity: {humidity}%")
print(f"Weather description: {weather_desc}")
```

JSON File :

```json
{
  "coord": {
    "lon": -73.99,
    "lat": 40.73
  },
  "weather": [
    {
      "id": 800,
      "main": "Clear",
      "description": "clear sky",
      "icon": "01d"
    }
  ],
  "base": "stations",
  "main": {
    "temp": 15.45,
    "feels_like": 12.74,
```

```
    "temp_min": 14.44,
    "temp_max": 16.11,
    "pressure": 1017,
    "humidity": 64
  },
  "visibility": 10000,
  "wind": {
    "speed": 4.63,
    "deg": 180
  },
  "clouds": {
    "all": 1
  },
  "dt": 1617979985,
  "sys": {
    "type": 1,
    "id": 5141,
    "country": "US",
    "sunrise": 1617951158,
    "sunset": 1618000213
  },
  "timezone": -14400,
  "id": 5128581,
  "name": "New York",
  "cod": 200
}
```

Output

```
Current temperature: 15.45°C
Humidity: 64%
Weather description: clear sky
```
